->
-> Can someone tell me what freqs the 9600 bps packet activity is on in
-> preferably the Phoenix/East Valley area? I'd be interested in TCP/IP
-> 'regular' packet. I just picked up a PK-96 and will be ready to give
-> as soon as I make up a cable. Any info will be appreciated.
->

-> Tks & 73... Mark AA7TA

144.910 Simplex TCP/IP
144.950 Simplex KI7HD-5 White Tanks

Thats it...Everything else is closed links on 420 and 440 Mhz
there is a 440 repeater in tucson that is 9.6k, but not reachable
from East Valley

To: ham-digital@ucsd.edu

Hello digital radio amateurs,

Do you have an FAQ?
If so, please email it direct to me a.s.a.p. (And if you don't have one,
please say so, then let me get back to y'all with a few more questions).

I'm sorry about the anonymous posting (which you normally only see on
"alt.sex.abuse.recovery" and the like), but in my case, it is because I
am only getting Internet e-mail and my BBS does not receive your
newsgroup. As such, I can't even post to it except this roundabout way.

Also I have no way of reading replies posted to this newsgroup. I will
ask my sysop to carry you, then hope for the best. Till then, please get
in touch with me directly by emailing to mroberts%sec21@ax.apc.org.

Thanks.

(Mark Roberts)

To: ham-digital@ucsd.edu

Thank you for posting the text of 94-59 under another subject.

My question remains, however, as to if someone knows how to find 94-59 on fcc.gov. I would like to find such items myself and spent quite some time going from directory to directory there without finding it.

Perhaps some items will just not show up there?

A company called M/X-COMM makes some chips that should be usefull.

I don't have there phone number handy, but they do have a 1-800 number that you can get from 1-800-555-1212. I think they are in North Carolina. These chips implement most of the physical layer functions and some of the link layer also.

Good Luck!

Hi Jim, I have the same combination which I put together a few years ago...
I had no trouble making it work; haven't used it much lately... Just
one comment from your note, I hope you aren't really planning to put the
PSK modem IN your 1270; it won't fit and isn't designed to. Stick it in
another small box. Enjoy!

73,
Tom
